Our Service Commitment

We are committed to developing a long lasting relationship with you, our customer. Our processes and quality controls ensure each and every product meets the highest possible standards. We partner with you to ensure you go to market with a competitive quality and design advantage.

Four Simple Philosophies:

- Quality and precision
- Delivery In Full and On Time
- Building robust and long term relationships with clients
- Commitment to Continuous Improvement principles

Jodek has forged a reputation within the engineering industry that can be truly envied. Our attention to detail and innovative approach has enabled us to deliver precision componentry reliably, within budget and on time.

When you partner with Jodek, you can rely on us to **'Do It Once'** and to **'Do It Right'**.

Products and Capabilities

We are continually striving to deliver first-class products and services to best fit our customers' needs. No job is too big or small. We are able to support all small, medium and long run jobs and provide consultation concerning designs, tooling and manufacturing.

From simple metal parts fabrication to complex designs, Jodek can produce a wide range of components across varied industries including Transport, Mining, Construction, Defence, Aviation, Medical, White Goods plus many more.

Our Services

- CNC Turning & Milling
- Multi Axis Turning
- Production Cutting
- Finished Product Assembly

Our Material Capabilities

- Mild & High Tensile Steel
- Stainless Steel
- Brass & Copper
- Aluminium & Alloys
- Tool Steel
- Machining of Castings
- Engineering Plastics

Local Service Alliances

Helping to streamline your manufacturing processes, we have developed numerous strategic alliances with highly skilled and quality focused service providers to support an integrated manufacturing process.

Alliance engineering services include:

- **Welding & Sheet Metal Fabrication**
- **Laser Cutting**
- **Grinding**
- **Heat & Surface Treatments**

Technology and Capacity

Our factory located in Mordialloc boasts the latest Computer Numerically Controlled (CNC) Turning and Milling machinery, manufacturing precision machined parts to your specific needs. Multi Axis equipment, milling, tapping and finishing services provide a range of dimensional and surface characteristics with computerised production and schedule control.

We have introduced best practice manufacturing techniques. We employ highly skilled staff and continue to develop skills across our entire workforce. We are constantly upgrading our machinery to ensure we are always at the forefront of technology.

Some of our machines include:

- **Mori Seiki NL2500SY**
- **Miyano ABX 51TH2**
- **Miyano BNE 51SY**
- **Daewoo CT 250**
- **Hardinge 4 Axis Machining Centre**
- **Kasto Automatic Bandsaw**

“Do It Once, Do It Right”

Quality and Innovation

Our quality management system encompasses all aspects of our operations from order to delivery ensuring world class product quality, service and on time delivery. We are committed to a Continuous Improvement philosophy and LEAN management techniques. We are continually refining and streamlining our systems to support our customers with a seamless integrated supply chain service.

We are committed to manufacturing the highest quality components at a competitive price with a focus on long term relationships and leading edge solutions.

Jodek is fully accredited by SAI Global Certification Services to the AS/NZS ISO9001 international quality standard.
